

Kids, please ask a reasonably crafty adult for help!

Instructions:

1. Download the disguises by clicking the download button.
2. Print off the disguises on paper. Preferably using a color printer.
3. Carefully cut out the hat and mustache shapes.
4. Punch two holes through a hat piece, and then tie a string through them. Or try stapling rubber bands to it, then loop them around your ears. That might work.
5. Affix the mustache piece between your nose and upper lip. Maybe you could just hold it under your nose and make it look like you're scratching your face.
6. How does it look? Does anyone recognize you? Maybe add "a" to certain words when you talk: "That's a-right!"
